

## GMD EEO Advisory Representative: Ann Thorne

### [Ann Thorne](#)

I was born in Washington, DC and raised in Silver Spring, MD. After attending Colorado State University in the 1980's, I decided to relocate to Colorado. As a Program Management Specialist in the Earth System Research Lab, my job is extremely varied. My passion is for student programs and I am the Student Program Coordinator for ESRL. I enjoy working with students from all over the country and the world, and seeing their passion for science. When I am not working, I enjoy spending time with my family, riding horses, and volunteering as an advocate for animal welfare.
